

EZ Manager

Release Date: 2023-11-11

Version: 2.0.1

EZ Manager is a software solution designed to streamline workflow, inventory management, and accounting processes for businesses of all sizes. It offers a comprehensive platform to optimize operations and enhance productivity.

EZ Manager enables efficient task management, and effective resource allocation. Its strong inventory management capabilities minimize stockouts and overstocking, while seamless integration with accounting software eliminates manual data entry.

Containing comprehensive reporting, EZ Manager offers actionable insights to drive growth and innovation.

Functions

Workflow Management Tools:

Efficiently manage and automate business processes to improve workflow efficiency.

Inventory Tracking:

Track inventory levels in real-time, streamline stock management, and minimize stockouts.

Accounting Integration:

Seamlessly integrate with popular accounting software to synchronize financial data and streamline bookkeeping.

Reporting Capabilities:

Generate detailed reports on inventory status and financial transactions to gain valuable insights into business operations.

Automated Email Alerts:

EZ Manager enables customizable email alerts for low stock, pending client payments, and deadlines. Receive timely notifications for efficient inventory and client management.

Benefits

Streamline accounting processes:

Seamless integration automates invoicing, and reporting, simplifying financial operations.

Optimize inventory management:

Real-time tracking and analysis help maintain optimal stock levels, minimizing costs and preventing stockouts.

Automated Notifications:

EZ Manager sends automated emails for stock updates, overdue client notices, and more, helping you stay informed about your business.

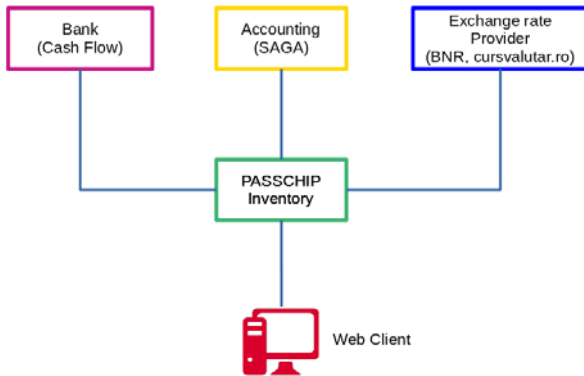

Increase productivity and profitability:

By enhancing efficiency and providing valuable insights, our solution boosts overall productivity and profitability.

Quality Assurance:

EZ Manager ensures data accuracy through meticulous quality control check, minimizing errors and maintaining data integrity.

Installation

Installation is done on customer premises.

Ordering

- EZ Manager: License for software solution

Warranty

- 2 years from delivery for software:
 - Bugfixes
 - Updates

Technical Specifications

EZ Manager

Communication	EZ Manager utilizes secure HTTPS protocol for communication between the client application and the server, ensuring data integrity and confidentiality. It supports RESTful API architecture, enabling seamless integration with third-party systems and services.
